

SYSTEMS ENGINEER

APPLICATION SUPPORT ENTERPRISE INFRASTRUCTURE SERVICES INFORMATION & COMMUNICATION TECHNOLOGY SERVICES (ICTS)

Are you experienced in providing intermediate technical support for business-critical services and/or infrastructure and have project management experience in a progressive ICT environment, with a strong customer focus and a demonstrable track record of innovative thinking, project-based delivery and productive interactions across multiple teams? The Enterprise Infrastructure and Services division seeks a Systems Engineer to develop infrastructure and services through project work, to maintain and support ICT systems, services and infrastructure and provide technical leadership in a complex and heterogeneous systems and infrastructure environment. This role plays a critical part in ensuring that UCT derives value from its investment in IT infrastructure and reports to a senior manager.

Responsibilities include:

- Providing highly technical support for business-critical services, systems and/or infrastructure.
- Maintaining and managing business-critical ICT systems and/or infrastructure services.
- Troubleshooting, remediation and optimization of business-critical services, systems and/or infrastructure.
- Provides technical leadership for one or more system and/or infrastructure service components.

Required non-technical skills include:

- Ability to prioritize and manage work under pressure.
- Excellent written and spoken communication skills.
- A strong customer service ethic.
- Ability to work as part of a team.
- Analysis and problem-solving ability.

Minimum requirements include:

- Relevant qualification at NQF level 6 and/or 3 years' experience in enterprise ICT applications and infrastructure and support
- Working knowledge of:
 - application administration and life-cycle management
 - server operating systems (Linux would be advantageous)
 - authentication and authorization technologies and protocols
 - virtual hosting environments: VMWare, HyperV, Citrix etc.
 - Single Sign-on/Federation technologies such as CAS, SimpleSamlPhp, ADFS or Shibboleth
 - Application security principles, access permissions and privileges
- Solid knowledge of network infrastructure services e.g. DNS, DHCP and various networking protocols

Advantageous:

- Web server administration, configuration and optimization (Apache, Tomcat, IIS).
- Database administration (MS SQL, MySQL, PostgreSQL, Mongo or MariaDB).
- Application performance monitoring, troubleshooting and optimization.
- Project management principles.

The annual remuneration package, including benefits, is R355670 to R418435 per annum.

To apply, please e-mail the below documents in a **single pdf file** to: icts-jobs@uct.ac.za

- UCT Application Form (download at <http://forms.uct.ac.za/hr201.doc>)
- Cover letter, and
- Curriculum Vitae (CV)

An application which does not comply with the above requirements will be regarded as incomplete. Only shortlisted candidates will be contacted and may be required to undergo a competency test.
